

# BEUCRAUS

This game is played with 2 dice and three or more players (can be played with two players but it gets a bit dull).

Note: There is no 4. Rolling 4 is effectively a pass.

All players start the game by putting a coin on 7.  
The player rolls the dice. If a 3, 5, 6, 8, 9, 10, 11 is rolled, the player checks the number for a coin. If there is a coin there, the player takes it. If there is no coin, the player puts one down on that number.  
If a seven is rolled, the player puts a coin in (the pile coins on 7 could get quite large).  
If a two is rolled, (the pig) the player takes the coins on all numbers except 7.

If the player rolls 12, (The King) the player takes all coins.

After the player rolls, the dice are passed to the left. The game ends when everyone is poor. People can join and drop out at any time
